# EHS costs high?

Lower environmental compliance costs with automation

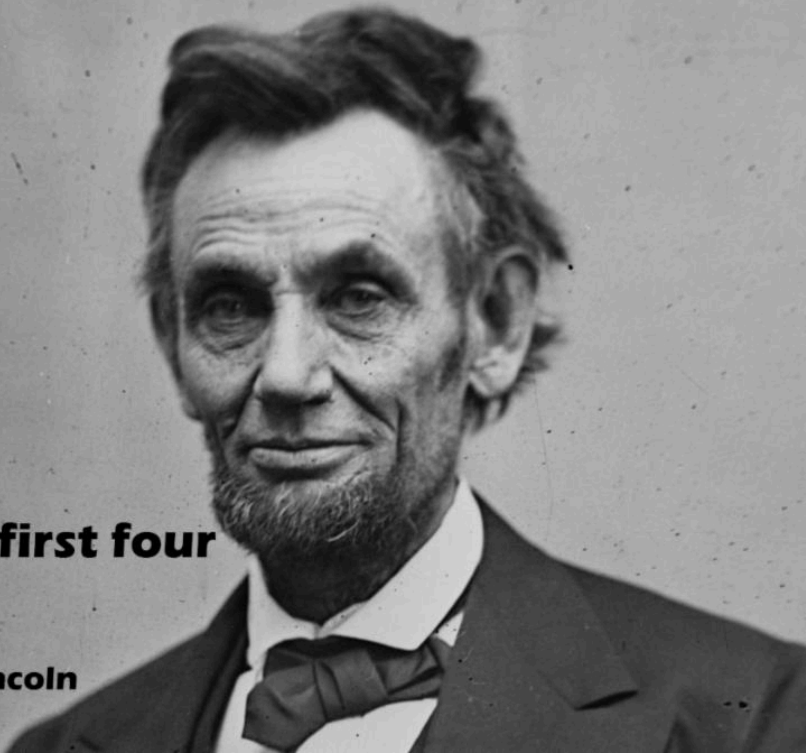

Yesterday i did a job for a client that would have taken me 50 hours without EnviroAI search. Instead I was able to complete the job in less than 6 hours.

The client asked me to research companies handling a certain feedstock, what companies were doing with the feedstock, how they were transporting the feedstock, and the amounts of feedstock being utilized.

The net savings to the client using EnviroAI for this job was \$15,750. And I was able find information that otherwise I never would have found. Also, the job was completed in just over a 1/2 of a day rather than a week.

**Give me six hours  
to chop down a tree  
and I will spend the first four  
sharpening the axe.**

“Companies purchasing EnviroAI have invested in a sharper axe. It is irrefutable that EnviroAI performs certain tasks faster. Therefore, why most companies and consultants want to keep chopping down trees with a duller axe for longer periods of time, or pay more for the labor, is beyond me. It is like not wanting to buy a tractor to plow your field because it costs too much or doesn’t also wash your laundry.”
