My latest for @EaterAustin is a juicy one: the story of a worker strike at @JuiceLand earlier this year,

---“Spills happen.

Releases happen.

And good things happen!

Environmental investment factors can change in a matter of minutes.

It's a dynamic world.”

Monitoring

The monitor displays the EnviroAI web application. At the top, there is a search bar containing the text "e.g. flares, net heating value, RN101914042" and navigation links for "Store", "Contact", and "About". Below the search bar, the interface is divided into several sections:

- Left Panel:** Contains a "Show Poppups" toggle, an "Air Search" section with a "Facility Keyword" dropdown, and a "Founding Box" with a "Keyword" field. Below this is a list of facilities including "exxon baytown", "EXXON MOBIL CHEM", "BAYTOWN CLEANING PL", "EXXON MOBIL CHEM", "WIN CHEMICAL", "WIN CHEMICAL", "SIBL BAYTOWN", and "FEED".
- Center Panel:** Displays "Mission Events" for "EXXON MOBIL BAYTOWN REFINERY" with ID "RN102579307". It includes a table with columns for "ID", "Name", "Status", and "Date". A "HS Task Calendar" is also visible below the table.
- Right Panel:** Shows a map view of the refinery facility with various tanks and structures labeled. A red alert box in the top right corner reads "Alert: Tank 135".

At the bottom of the monitor, the EnviroAI logo is visible, along with "Terms and Conditions" and "Need help?" links.
