Nature is extraordinary!!! . . .

November 12, 2020

---“A relationship exists in nature that transcends time and distance. If this doesn't completely 'weird you out' . . . check your pulse.”

- Jed Anderson, Creator, EnviroAI

---“Nature isn't classical, dammit . . . and if you want to make a simulation of nature, you'd better make it quantum mechanical.”

-Richard Feynman

---“Quantum entanglement
is spooky . . . but handy.”

The background of the entire image is a photograph of an aurora borealis (Northern Lights) over a body of water at night. The aurora displays a spectrum of colors including deep blues, bright greens, and soft purples. The water in the foreground is calm, reflecting the colors of the sky. The horizon line is dark, with the silhouettes of trees and land visible against the glowing light.

Quantum Data.

—“It from bit.” – John Wheeler

---“At some level, and perhaps the fundamental level, nature is part of a probability wave function. Unbelievable. Incredible. Extraordinary!”

---“Truth is truth . . .
even where we cannot
perceive it.”
