

POST

No more flaring? . . . Deer Park and La Porte?

October 28, 2020

A Community Alternative---“The Triangle” Regional Environmental Treatment Center

Of the 10,000 of you ... a number of you will be interested in this project and concept.

No more flaring?

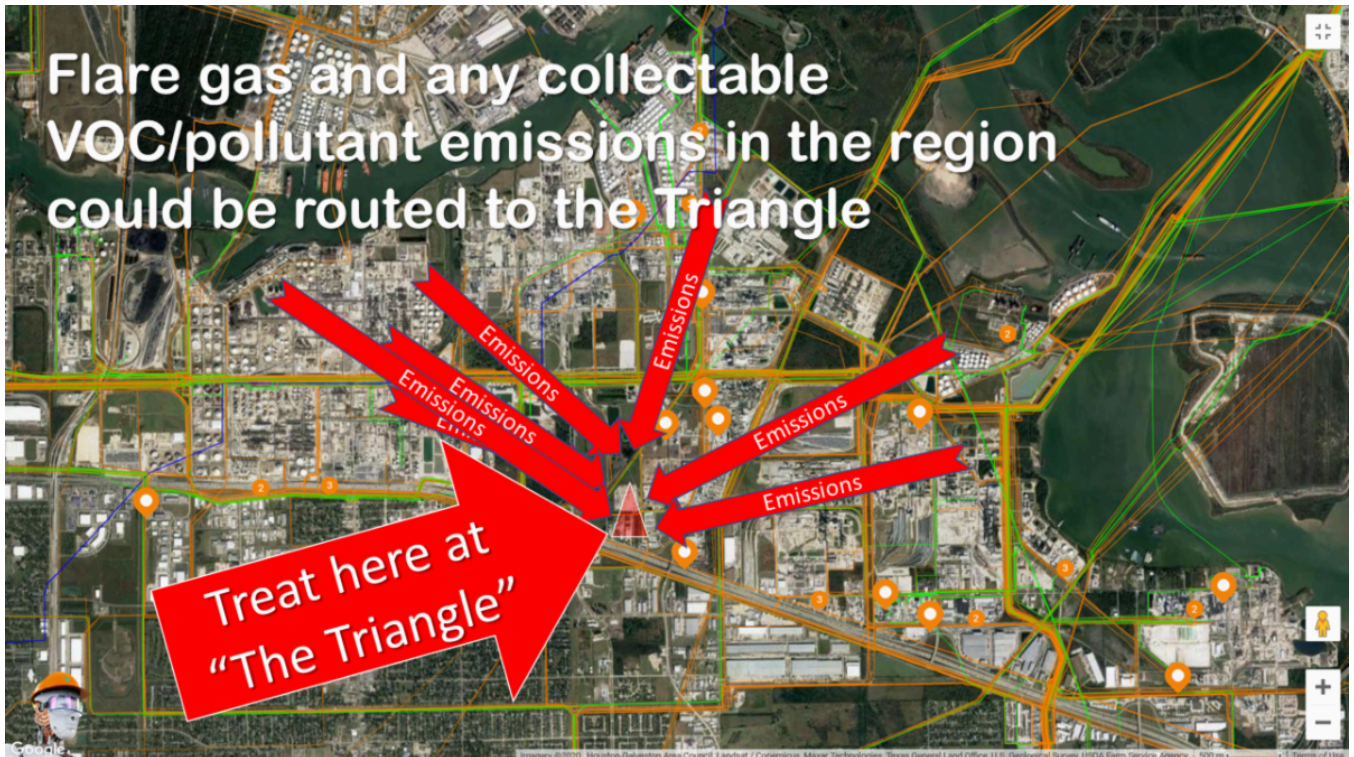

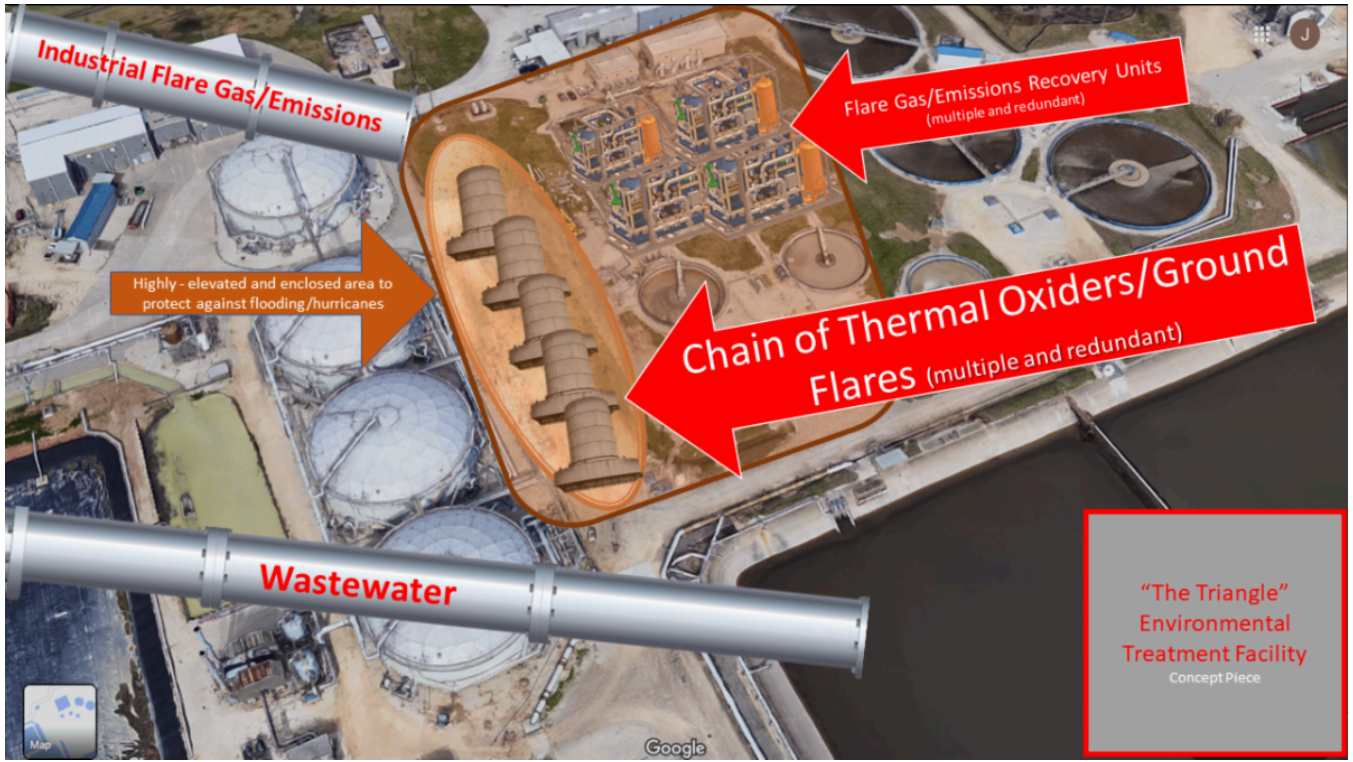

A Community Alternative

A regional treatment solution.

The “Triangle” could eliminate the need for elevated flares and flaring in the ship channel area.

Enhanced Community & Worker Safety.

Efficiency.

Environmental Protection.

❖ Start-up, Shutdown, and Maintenance Emissions

- Capacity would be built into the system to handle most turn-arounds in the region since companies do not typically have turn arounds at the same time
- Companies could startup and shutdown much faster because of the additional capacity in this system

❖ Routine Process Emissions

- ✓ **Redundancy** – Chain of thermal oxidizers/ground flares
- ✓ **Efficiency at Scale** – Flare gas/VOC recovery for energy usage
- ✓ **Safety & Environmental** – State of the art emission controls . . . where treatment is our business
- ✓ **Cost Savings** – Companies would be emitting significantly less pollution and could focus more on production units

❖ Upset Emissions

- Capacity would be built into the system to handle most upset emissions in the region since companies do not typically have upsets at the same time

*It should be noted that this facility will be built considerably above-grade and with additional protections to improve industry storm resiliency.
