Augmented ... Environmental Management Information System ... Intelligence

Augmented Environmental Intelligence

Once completed, selecting this button will pull up your facility(s) in EnviroAI ... and engage your internal Environmental Management Information System (EMIS) if you wish (either ours, yours, or a 3rd party vendors). Firewalls will remain intact with only one-way transmittal of data (i.e. external data informing internal data). The feature will essentially be plug-and-play.

---“Externally informed EMIS harnessing the power of big data and artificial intelligence. It’s taking the external world’s digitized environmental intelligence and using it to help make an industrial plant’s internal digital systems and human intelligence smarter, more efficient, and more productive.” - Jed Anderson, Creator, EnviroAI

Internal Management System

The screenshot displays the AI Earth EMIS interface. On the left, a 'Document Query' sidebar shows a search for 'flare emissions mar' and a list of facilities including 'MARATHON PETROLEUM TEXAS CITY REFINERY'. The main area shows a list of documents for 'MARATHON PETROLEUM TEXAS CITY REFINERY' with details like 'RN100210608' and a list of reports. On the right, a satellite map of the 'Marathon Refinery - Texas City' is shown with various equipment labeled, such as 'TANK 115', 'CALUSTIC SCRUBBER STACK', and 'COOLING TOWER # 8 EMISSIONS'. A 'Today's EHS Task List' is visible on the map. The interface includes navigation icons, a user profile, and a 'Need help?' link.

ENVIRONMENTALINTELLIGENCE.DATA.POWER. SPEED.
