Our customers are winning the environmental war to improve environmental compliance at less cost to their companies. We give them more information.

Above and below for example you can see our system storing TCEQ permits and LDEQ documents. As of this hour for example, there are 187,866 air permits in the State of Texas. EnviroAI applies NLP machine-learning to this data to to help our customers derive additional environmental intelligence.

—“Data is not the same as information. We use machine-learning to help convert data to information. This augments the intelligence of our customers and speeds-up their information processing capabilities. Better for the environment. Better for the financial success of our customers. Better for the world.” - Jed Anderson, CEO, EnviroAI
